Rob	Product Manager	6	6	6	6	6	6	6	6	48			I think in the 18F parlance I am the "product owner" --- which seems equivalent to me.	I think this is great. I wonder if "external users" should be called out, not because they are paid, but as a separate time budget item? And I guess we don't need to add any hardware/software costs since all of that is already invested?
